

Psychology - Applied: Bachelor of Science (also: Honours)

Faculty of Social Sciences	
kwantlen.ca/socialsciences	
IMPLEMENTATION DATE	START DATE(S)
01-Sep-2011	September January May
ADMISSION TYPE	ENROLMENT TYPE
Selective entry	Open access
PROGRAM TYPE	CREDENTIAL GRANTED
Undergraduate	Baccalaureate Degree
OFFERED AT	FORMAT
Langley Richmond Surrey	Full-time Part-time
HOW TO APPLY	
www.kwantlen.ca/admission	

DESCRIPTION

While Bachelor of Science in Psychology degrees have existed at universities since the late 1800s, recent developments have proclaimed that "the psychology of science has arrived" (Journal of Psychology of Science and Technology, 1, 205, 2008). The Bachelor of Science in Applied Psychology is an interdisciplinary program rich in Psychology and Natural Sciences content. It is built primarily upon the attributes that have proven successful in the existing Bachelor of Applied Arts (BAA) and Bachelor of Arts (BA) in Psychology degrees. The foundation of the degree is rooted in Kwantlen's existing two year science curriculum, with an emphasis on Biology and Chemistry, and on core base courses in Psychology.

The degree was developed in close connection with employers in the field and community partners, and has an applied focus that prepares students for employment upon graduation, for research-focused graduate studies, or for entry into professional programs of study. Many courses within this program have a lab component. The program will take a systems/ecological approach, recognizing the interrelationships between humans and their environments, and the ways in which each influences and alters the other.

During the third and fourth year students will take courses across three main topical areas within Psychology: (1) research skills (statistics, program evaluation, qualitative and quantitative research, and tests and measurement); (2) biological psychology (neuroscience, drugs and behaviour, neuropsychology, and learning theory and practice); and (3) health psychology (developmental psychopathology, rehabilitation, clinical intervention, psychopathology, psychology and law, health psychology, and aging). The degree will be embedded throughout with psychological application, including hands-on lab experience and courses focusing on human interaction with (and use of) modern technology, ethics, professional business practices, and technical writing. Students will be required to participate in a workplace practicum co-supervised by faculty and employers. The Bachelor of Science in Applied Psychology degree

provides innovative academic rigor encompassing exploration, inclusiveness, excellence, integrity, community, and accountability with clear employment outcomes. An existing Honours program in Psychology would be utilized to prepare interested students for research-focused graduate studies.

Students interested in applying to graduate school or who prefer a more extensive research experience are encouraged to apply to the Honours program. The Honours program affords students an opportunity to develop and report on a research project under the direct supervision of a faculty member within the Psychology Department.

CAREER OPPORTUNITIES

While taking the program, students will be required to participate in a workplace practicum co-supervised by faculty and community employers. They will have the opportunity to test their skills and knowledge in specific contexts, to observe the relationships between specific disciplinary techniques, and to appreciate the complexities of technical and human interactions. They will see, first hand, that no single method is sufficient, no single discipline capable of interpreting and responding to modern individual, community and workplace challenges. The shared responsibility for the practicum taken by academic and community sponsors will provide a powerful balance between classroom and workplace learning, deepening both.

A student who successfully completes the B.Sc. in Applied Psychology, will have reliably demonstrated the ability to:

- critically examine the research literature
- contribute effectively to a seminar discussion
- deliver a presentation based on primary source research
- communicate ideas effectively in writing and in oral form
- critically evaluate primary and secondary source material
- develop a research program
- apply skills in a relevant work setting
- demonstrate solid ethical decision making both in research and practice
- work within an interdisciplinary framework
- demonstrate comprehensive and critical understanding of statistical and methodological approaches to scientific enquiry
- demonstrate a working knowledge of various scientific technologies and techniques

The degree was developed in close collaboration with industry/employers to ensure positive outcomes and maximum opportunities. Graduates of this degree could therefore find employment in areas such as vocational rehabilitation, mental health services, gerontology, neuropsychological testing, forensics, disability services, software usability research, research and design, pharmaceutical companies, and child care consultancy. They would also be well prepared for researched focused graduate studies in neuroscience, psychology, counseling, public policy, kinesiology, and special education, and post-graduate programs in physiotherapy and occupational therapy.

PROGRAM ADMISSION REQUIREMENTS

In addition to Kwantlen's General university admission requirements including the undergraduate-level English Proficiency Requirement, the following program admission requirements apply.

Year One Admission:

- English 12 with a minimum grade of B (or equivalent)
- Principles of Mathematics 12 with a minimum grade of C+ (or equivalent)
- Principles of Physics 12 with a minimum grade of P (or equivalent)
- Chemistry 12 with a minimum grade of C+ (or equivalent)

Year Three Admission:

Students can enter the program in third year, provided they have completed all required courses with a cumulative GPA of 2.7 or higher and a C or higher in Psychology 2300 and 2400 (or equivalent transfer credits). Students are advised to consider prerequisites for 3rd and 4th year courses when applying for entry into the 3rd year of the program.

A student who has completed courses at another post-secondary institution may request that these credits be transferred to Kwantlen Polytechnic University. Transfer students may be admitted to the program, space permitting, at any point up to the seventh semester. This structure follows the approved B.Sc. framework in place at Kwantlen Polytechnic University with respect to both minimum academic standards to progress in the program, as well as entrance requirements.

Honours Admission:

In order to be admitted to the Honours program students are expected to achieve and maintain a cumulative GPA of 3.3 and to obtain a 'B+' grade in both PSYC 3300 and 3400. Students must also obtain endorsement from a faculty member who will serve as their thesis advisor, and be recommended by the Psychology Honours selection committee. Selections are made in May for the following September.

A limited number of seats are available each year for Honours students. Interested students can obtain a program application form from the Psychology Department during or after their third year.

- o English 12 with a minimum grade of B (or equivalent)
- o Principles of Mathematics 12 with a minimum grade of C+ (or equivalent)
- o Principles of Physics 12 with a minimum grade of P (or equivalent)
- o Chemistry 12 with a minimum grade of C+ (or equivalent)

CONTENT

The learning environment and methodologies will utilize all current andragogical techniques that enhance student learning. Faculty will adopt approaches that provide students with a participatory and collaborative learning environment that merges theory and research with experiential participation. These approaches include traditional classroom instruction, computer simulations and experiential web materials, small seminar groups, field trips to research facilities and medical units where appropriate and "hands-on" training and experience with industry/academic-specific methodological techniques. Faculty-supervised independent and/or collaborative student research will also be a key component of study in several courses with particular emphasis on in-depth research, both qualitative and quantitative, in both the practicum and Honours program courses.

Methodologies will be specifically aimed at enhancing student success in identified learning outcomes. Common themes to

these outcomes beyond the knowledge-based aspects of the curriculum will be critical thinking, analytical skills, team building, communication skills and employability skills, as well as the ability to move beyond theoretical constructs to operationalization for the purpose of problem identification and problem solving. The goal will be the development of well-educated, critically aware and articulate graduates who demonstrate a thorough understanding of current issues, theory and research in the psychological sciences.

Anecdotal evidence suggests that many students are dissatisfied with traditional science offerings that are perceived as leading only to graduate studies or specialized professions. In addition to preparing students for more traditional pursuits, the B.Sc. in Applied Psychology degree offers job-focused, job-ready, innovated learning that prepares students for new types of positions in the science, health and pharmaceutical industries, and for constant change in today's workplace.

Applied Psychology Honours

The following are the requirements for the Bachelor of Science in Applied Psychology Honours program.

The Honours program consists of two 6 credit thesis courses (PSYC 5002 and PSYC 5010) that are offered in September and January respectively. For the BSc in Applied Psychology, these courses can be taken within the 120 credits required for degree completion.

Students choosing the Honours degree, must take the following in lieu of 2 electives:

PSYC 5002	Honours Thesis I (BSc)	6 credits
PSYC 5010	Honours Thesis II	6 credits

Applied Psychology Degree

CORE REQUIREMENTS

The following core requirements are to be completed for the Bachelor of Science in Applied Psychology:

- A minimum 120 credits and a minimum of 40 courses total at the post-secondary level
- A minimum 6 credits writing requirement
 - ENGL 1100 and CMNS 3100
- A minimum 6 credits mathematics, at least 3 credits of which are statistics
 - MATH 1130 (or MATH 1120)
 - MATH 1230 (or MATH 1220)
 - PSYC 2300
- A minimum 72 science credits including at least 36 credits at the 3000 and 4000 level. Included in this are required courses in biology, chemistry, psychology and physics outlined below.
- A minimum 24 credits general education requirement, including at least 3 credits at the upper level
- A passing grade in all courses counting towards the Bachelor of Science, with a cumulative GPA of 2.0 or higher
- A minimum 60 credits taken at Kwantlen Polytechnic University, or approval to transfer a maximum of 90 credits.

YEAR ONE REQUIREMENTS

All of:

BIOL 1110	Introductory Biology I	4 credits
BIOL 1210	Introductory Biology II	4 credits

CHEM 1110	The Structure of Matter	4 credits
CHEM 1210	Chemical Energetics and Dynamics	4 credits
ENGL 1100	Writing, Reading and Thinking: An Introduction	3 credits
PHYS 1101	Physics for Life Sciences I	4 credits
PSYC 1100	Introduction to Psychology: Basic Processes	3 credits
PSYC 1200	Introduction to Psychology: Areas and Applications	3 credits

One of:

MATH 1120	Differential Calculus	3 credits
MATH 1130	Calculus for Life Sciences I (recommended)	3 credits

One of:

MATH 1220	Integral Calculus	3 credits
MATH 1230	Calculus for Life Sciences II (recommended)	3 credits

YEAR TWO REQUIREMENTS

All of:

BIOL 2321	Cell Biology	4 credits
CHEM 2320	Organic Chemistry I	4 credits
PSYC 2300	Applied Statistics	3 credits
PSYC 2315	Brain and Behaviour	3 credits
PSYC 2375	Perception	3 credits
PSYC 2385	Cognition	3 credits
PSYC 2400	Experimental Psychology: Research Methodology	3 credits

One of:

BIOL 2320	Genetics	4 credits
BIOL 2421	Cellular Biochemistry	3 credits

Two of three electives chosen from:

One of:

PSYC 2320	Developmental Psychology: Childhood	3 credits
PSYC 2321	Developmental Psychology: Adolescence	3 credits
PSYC 2322	Developmental Psychology: Adulthood	3 credits

Or:

PSYC 2330	Social Psychology	3 credits
-----------	-------------------	-----------

Or:

PSYC 2350	Psychopathology	3 credits
-----------	-----------------	-----------

YEAR THREE AND FOUR REQUIREMENTS

All of:

CMNS 3100	Technical Report Writing	3 credits
-----------	--------------------------	-----------

PSYC 4000	Practicum	3 credits
PSYC 4800	Professional & Ethical Issues	3 credits

Two of:

Research Psychology

PSYC 3300	Applied Statistics II	3 credits
PSYC 3400	Applied Research I	3 credits
PSYC 3960	Program Evaluation	3 credits
PSYC 4100	Tests and Measurement	3 credits
PSYC 4400	Research Methods II: Qualitative Methodologies	3 credits

Two of:

Biological Psychology

PSYC 3303	Learning: Theory and Practice	3 credits
PSYC 3320	Drugs and Behaviour	3 credits
PSYC 3910	Neuropsychology	3 credits
PSYC 4315	Neuroscience	3 credits

Two of:

Health and Clinical Psychology

PSYC 3350	Advanced Topics in Psychopathology	3 credits
PSYC 3450	Clinical Psychology: Intervention	3 credits
PSYC 3451	Psychology and Law	3 credits
PSYC 3600	Health Psychology	3 credits
PSYC 3920	Aging	3 credits
PSYC 4350	Developmental Psychopathology	3 credits
PSYC 4910	Rehabilitation	3 credits

Two of:

Applied Psychology

PSYC 3200	Industrial and Organizational Psychology	3 credits
PSYC 3220	Group Dynamics	3 credits
PSYC 3500	Interpersonal Relations I	3 credits
PSYC 3930	Consumer Psychology - Research & Applications	3 credits
PSYC 4200	Human Factors & Ergonomics	3 credits
PSYC 4920	Human Factors and Computer Interface Design	3 credits

One of:

Culture and Diversity

PSYC 4700	Culture and Psychology	3 credits
-----------	------------------------	-----------

Any other cultural course at Kwantlen

Any 8 Electives*

Suggest some be 2nd or 3rd year science and/or mathematics

Must have at least 24 general education (breadth) credits

GRADUATION

Upon successful completion of the honours program, students are eligible to receive a **Bachelor of Science in Applied Psychology (Honours)**.

Upon successful completion of the degree program, students are eligible to receive a **Bachelor of Science in Applied Psychology**.
