

Trades Innovation: Bachelor of Technology

COMING SOON!

This degree provides the pathway for individuals to ladder into the third year of the degree with a Trades Qualification recognized by the Industry Training Authority of BC (ITABC), and/or a Red Seal with Human Resources Service Development Canada (HRSDC).

This degree will also accept students into the third year of the degree with post-secondary credits awarded in approved trades and/or technology courses. Approved courses will be identified as having substantial trade and/or technology focus to provide a foundation that will support the proposed community/industry based projects in the fourth year.

Students engaged in full-time study will be able to complete the Bachelor of Technology in Trades Innovation over four semesters. Entrance requirements into third year include 60 undergraduate credits or equivalent.

Course curriculum is currently being finalized. Watch for the full program requirements in the **2012-13 Academic Calendar**.
