

Engineering: Certificate

Faculty of Science and Horticulture	kpu.ca/science
Implementation Date	01-Sep-2011
Start Date(s)	September
Admission Type	Open admission
Enrolment Type	Open enrolment
Program Type	Undergraduate
Credential Granted	Certificate
Offered At	Richmond Surrey
Format	Full-time Part-time
How to Apply	www.kpu.ca/admission

DESCRIPTION

The Certificate program in Engineering is a one year pre-engineering program designed to prepare students for admission to the engineering programs at UBC and SFU. KPU offers the full first year of the Engineering core program for students wishing to transfer to UBC or UVic in the following areas of engineering:

- Chemical and Biological Engineering (UBC)
- Civil Engineering (UBC)
- Computer Engineering (UBC, UVic)
- Computer Science (UVic)
- Electrical Engineering (UBC, UVic)
- Engineering Physics (UBC)
- Geological Engineering (UBC)
- Integrated Engineering (UBC)
- Mechanical Engineering (UBC, UVic)
- Materials Engineering (UBC)
- Mining Engineering (UBC)
- Software Engineering (UVic)

KPU's first year program is based on UBC's. With one second-semester course substitution students can also complete UVic's first year program. Most, but not all, of KPU's courses transfer to SFU's Engineering Science program. Please contact SFU for details. Students who wish to transfer to UNBC/UBC's joint Environmental Engineering program can meet most first year plus one second year requirement with one or two course substitutions. Students must still apply formally for admission to the destination university as transfer from KPU is not automatic. They must then compete with all other second year students for seats in the Engineering program of their choice.

Transfer to an Engineering Degree

1. Further information about English and elective courses that qualify, or about threshold requirements for admission to an engineering program at the various universities, are available through Educational Advising offices on all campuses.
2. Students intending to transfer to engineering at a university other than UBC or UVic should ensure that course selections conform to requirements at that university.
3. For specific course transfer information, go to the **BCCAT** website at www.bccat.bc.ca Some of our courses do not

show direct transfer, but are accepted in lieu of the specified university courses.

4. For more information about the Engineering profession and about transfer between the Universities and Colleges, visit the Association of Professional Engineers and Geoscientists' web site www.apeg.bc.ca/students.

PROGRAM ADMISSION REQUIREMENTS

General university admission requirements apply to this program including the undergraduate-level English Proficiency Requirement.

Students wishing to complete the program in eight months, should refer to the Eight Month Engineering Certificate program.

Note: Students with a C or C+ in Principles of Mathematics 12 or Pre-calculus 12 may be eligible to write the Mathematics Placement Test to determine suitability for first year calculus (MATH 1120).

PROGRAM REQUIREMENTS

Many of the courses are offered in both fall and spring semesters.

All of these courses transfer individually with credit for the equivalent course at the destination universities, with two exceptions for UBC: A student must complete both of KPU's APSC 1151 and APSC 1299 to receive credit in lieu of UBC's APSC 150; and must complete both KPU's PHYS 1120 and PHYS 1220 to receive credit in lieu of UBC's PHYS 153.

All of the following:

Semester 1 - Fall

APSC 1124	Introduction to Engineering	1 credits
APSC 1151	Introduction to Engineering Graphics	3 credits
CHEM 1154	Chemistry for Engineering	4 credits
CPSC 1103	Introduction to Computer Programming I	3 credits
ENGL 1100	Introduction to University Writing (or another 1100 level ENGL course)	3 credits
MATH 1120	Differential Calculus	3 credits
PHYS 1120	Physics for Physical and Applied Sciences I	4 credits

Semester 2 - Spring

APSC 1299	Introduction to Microcontrollers	3 credits
MATH 1152	Matrix Algebra for Engineers	3 credits
MATH 1220	Integral Calculus	3 credits
PHYS 1170	Mechanics I	3 credits
PHYS 1220	Physics for Physical and Applied Sciences II	4 credits

One Complementary Studies elective (see below).

Note: MATH 1220, PHYS 1220 and APSC 1151 are normally also offered on an accelerated basis in May/June.

KPU also offers a number of second-year mathematics and science courses that transfer individually, as well as a wide range of suitable electives to round out a two-year part-time schedule.

Complementary Studies Electives

Most social science and humanities courses will meet the requirements of this 3-credit elective for UBC; UVic and SFU have somewhat restrictive lists of suitable courses. This includes the disciplines of Anthropology, Human Geography, History, Humanities, Philosophy, Political Science, Psychology and Sociology. The elective course must deal with some of the central issues, methodologies and thought processes of the discipline, and must not be mathematics or science based. Basic language courses (particularly mother tongue), physical geography and geology, statistics, computer science or studio/performance courses in the fine arts or music are not normally judged as satisfying the complementary elective requirement.

A second English course at the 1100 level would also meet the complementary elective requirement. In fact, for students who have not completed a minimum of five years of study in an English school in Canada or the equivalent in another country where English is the principal language, 6 credits (2 courses) of English 1100 level courses at KPU that transfer to UBC would satisfy both the complementary elective requirement and the English language requirement for admission to UBC. To confirm the transferability of the complementary elective requirement (or the language requirement), it is always advisable to contact the university in question.

Students planning to transfer to UVic should take CMNS 1110 as their complementary studies elective.

CREDENTIAL AWARDED

Upon successful completion of this program, students are eligible to receive a **Certificate in Engineering**.
