Japanese Culture and Business

Students will explore the role and characteristics of business in Japan and the powerful influence of business on contemporary Japanese culture. First, they will follow the development of industry and business in Japan from the beginning of the Edo Period until the end of the Second World War. Then students will examine the remarkable recovery and development of Japan's postwar economy that culminated, in 1980s and 90s, in theories and stereotypes relating to the concept of a unique Japanese business style. Finally, students will examine changes in the Japanese economy since the bursting of Japan's "economic bubble" in the mid-1990s, and the effects of these changes on business, society and culture today. Students will read texts as well as current articles in newspapers (such as the Wall Street Journal or The Daily Yomiuri (English edition), journals and magazines (such as The Economist), and watch movies and documentaries in order to explore a broad range of topics, from the role of business in Japan's international relations to its effects on the lives of individual Japanese and their environment.

Japanese Culture Through Film

Students will deepen their understanding of contemporary Japanese art and culture by viewing important post-war Japanese movies. They will focus on influential directors and characteristic genres, including but not limited to comedies, samurai epics and anime [animation]. Students will view a variety of works (in English or Japanese with English subtitles), discuss important themes and cultural references, and connect these movies to the broader Japanese culture, especially youth culture. They will observe how movies both make and question "culture" and, in turn, how culture determines the content of movies and their popular success. Students will read works by critics who examine various characteristics of Japanese culture, especially its "visual bias", evident in arts ranging from Japanese writing (Kanji) and wood-block prints (ukiyo-e) to contemporary movies, magazines, commercials, and fashion. Students will also identify the contributions of Japanese film to international "movie culture" and discuss, more generally, the importance of visual media in the post-modern, post-literate, non-rhetorical age of film, television and the Internet. Finally, they will consider how the increasing success of Japanese animation in foreign markets might contribute to Japan's cultural integration into the global community and discuss the future of post-modern technological societies.
