9.3 DENSITY

- 9.3.1 The following table specifies the maximum allowable base density, expressed as a Floor Area Ratio, per lot for each zone. The additional density columns permit additional density where the following specified location and amenity criteria have been provided. Additional density where achievable is applied during the development permit process. Within mixed use development, additional density may be awarded where the lot includes both commercial and residential uses. Tier 1 awards additional density where a development meets or exceeds the Tier 1 requirements, as specified within “Schedule D – Amenity Requirements for Additional Density” of this bylaw; Tier 2 awards additional density to a development which meets or exceeds the Tier 2 requirements within Schedule D. Where a development achieves additional density, the additional floor area may be added to the base density within the zone. A development may achieve all of the additional density available within the zone:

Zone	Maximum Allowable Floor Area Ratio (FAR)	Additional Density		
		Mixed Use*	Tier 1	Tier 2
COR1	1.00	N/A	+0.25	+0.25
COR2	1.25	N/A	+0.25	+0.25

It also prescribes required minimum distances between buildings and minimum setback distances between buildings, lot line, or other features and maximum building floor plates.

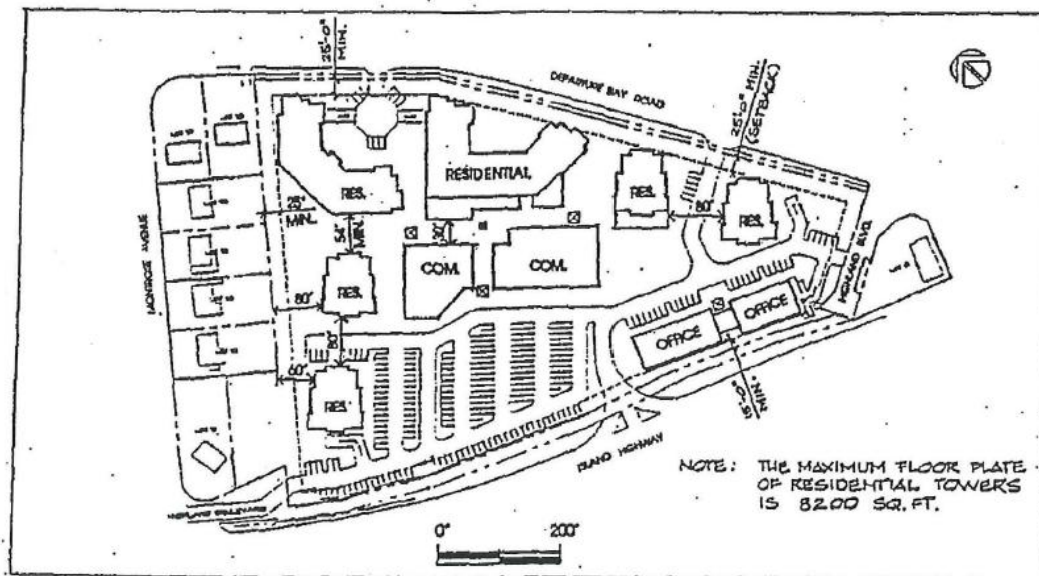

Exhibit 5
