## Connect to KPU's Secure Wi-Fi with Android

1. Tap the Settings icon, then click Connections, and then Wi-Fi.

**Employees:** Select **KPUSecureEmployee** from the list of available networks.

- 3. For EAP method, select PEAP
- 4. Scroll down until you see the Identity and Password fields.

**Students:** Enter your KPU email address (ending with @student.kpu.ca) as your Identity. Enter your KPU password in the password field.

**Employees:** Enter your KPU email address (ending with @kpu.ca) as your Identity. Enter your password.

- 5. For a more secure connection, click on **CA Certificate**, then select **Use system certificates.**
- 6. For Online certificate status, select Don't validate.
- 7. In the Domain text box, enter **kpu.ca**
- 8. Under the **See More** tab, make sure **MSCHAPV2** is selected for **Phase 2 authentication.**
- 9. Press Connect.
