

Sociology

Sociology is the scientific study of society. Sociology provides you with the knowledge and skills to stimulate your imagination and reflect about yourself and your place in both local and global communities. Sociology enhances social and cultural literacy that is essential for understanding personal relationships and personal growth. Our curricula will prepare you for living and participating in a diverse society as an informed citizen. A Sociology degree offers you an education that is both rewarding and practically useful in preparing you for your future career. A degree in Sociology will provide you with theoretical and analytical tools that will help you to better understand our complex multicultural society.
