DESCRIPTION

The Landscape Horticulture Systems specialization delivers basic horticulture knowledge as well as practical hands-on experience. Students resolve local landscape garden problems through landscape design classes. In landscape construction they learn by building features that become part of the campus landscape. Students study tree care, a program strength, where they practice pruning, planting, and tree management problem-solving skills in urban forests.

Graduates are working for landscape companies of all types and sizes. Many are successfully running their own landscape firms. Graduates have also established successful careers working for parks departments in cities across British Columbia.

Credit Application to a Degree Program

KPU BACHELOR OF HORTICULTURE SCIENCE

Graduates of a KPU Horticulture Technology Diploma with or without specialization can pursue one of KPU’s Bachelor of Horticulture Science degree programs, with a choice between the Urban Ecosystems major or the Plant Health major. (Please refer to the Urban Ecosystems or Plant Health section of the calendar for details.)

Students can combine their diploma education with the enhanced horticulture science knowledge at the degree level and earn two credentials (Diploma and Degree). Those who wish to pursue this option should meet with the Faculty of Science and Horticulture Degree Advisor to discuss applying credit to one of these unique School of Horticulture degree programs.

KPU BACHELOR OF BUSINESS ADMINISTRATION

A successful career progression in horticulture often leads to a management role. The Horticulture Technology diploma programs include a foundation in business skills and graduates may be eligible to apply over 30 program credits towards KPU’s Bachelor of Business Administration in Entrepreneurial Leadership.

Students can combine diploma-level education with enhanced business skills and earn two credentials (Diploma and Degree).

Students who wish to pursue this option should meet with the Faculty of Science and Horticulture Degree Advisor to discuss course planning that would facilitate application to the School of Business degree program.

STUDENT PROFILE

Students who wish to contribute to environmental and community well-being, engage in creative activities, own and operate their own business, or engage in hands-on work will enjoy horticulture.

Many students enter the Horticulture Technology Diploma to upgrade their skills or facilitate a career change. Faculty and staff are supportive and sensitive to the issues faced by students who embark on a post-secondary program after a significant period away from formal education.

Individuals with allergies to dust, pollen or plant products, or specific chemicals should be aware of the potential impact of practicing horticulture on their health. Moderate physical fitness and a healthy back are generally required for a successful career in horticulture.

NOTE: In addition to the Faculty Admission Requirements, students will be required to have completed a minimum of Mathematics 11 Foundations (with a C) or equivalent in order to complete the program without undertaking preparatory courses. Students are encouraged to speak with an Academic Advisor to plan course selection accordingly.

ADMISSION REQUIREMENTS

Students pursuing a Diploma in Horticulture Technology must be admitted to the Faculty of Science & Horticulture.

DECLARATION REQUIREMENTS

Students intending to graduate with Horticulture Technology diploma must declare the credential. At the time of declaration, the student must satisfy all of the following requirements:

- In good academic standing with the University.
- Completion of a minimum of 15 credits of undergraduate coursework.

CURRICULAR REQUIREMENTS

Students pursuing a Horticulture Technology Diploma with a Landscape Horticulture Systems specialization must complete at least 63 credits. Students should be familiar with the basic computer applications of word processing and spreadsheets. If students require upgrading, they should take CBSY 1105.
