

DELIVERY PLATFORMS

We aim to provide a wide range of valuable **classroom, laboratory, workshop, online, workplace** and **experiential learning opportunities** to ensure success. Ideal learning spaces at KPU include flexible classrooms with technology enhancements and hybrid learning spaces.

Advance your professional competencies from the comfort of your home through a variety of online technologies offered by KPU. Your online learning experience includes opportunities to collaborate and share with fellow students, meet with your instructor during online “office” hours and utilize technology to support your learning needs.

KPU has successfully launched a new Virtual Live Classroom (VLC) delivery platform for educational delivery to remote learners. This new delivery platform will be able to reach up to four remote locations that have good internet capabilities. Learners can experience **live, real time classroom instruction without the travel away from home. Please contact us for more details.**

ABOUT CPS

CPS offers a range of programs that allow you to continue your education, upgrade specific skills or discover something entirely new. All our courses are taught by highly experienced and knowledgeable instructors.

We also address the needs of a rapidly changing job market, where specialized skills and training are often needed and demand from potential employers is high. Elevate your career to the next level and maximize your marketability in the global workplace!

CANNABIS CAREER TRAINING

Our Cannabis program was the first of its kind in Canada. It is delivered online and available anywhere. Each course is instructed by an expert in the industry, who monitors your progress and conducts group discussions during the course through our online teaching platform. Our courses explore everything from plant production, facility management and quality assurance, to marketing and financing within the legal frameworks of the Cannabis Act. Become a part of the rapidly evolving cannabis marketplace!

COMMERCIAL BEEKEEPING

Get ready to manage a start-up colony and commercial beekeeping operation as you develop hands-on skills at KPU's beekeeping farm. You'll observe daily operations and take courses like bee biology, plant biology, beekeeping equipment and more. In addition, you'll also gain valuable skills like basic carpentry, farm welding and forklift certification, along with related skills in accounting and bookkeeping. This is a high demand industry with a shortage of qualified beekeepers. If you love nature and the outdoors, this could be the perfect career for you.

DESIGN

Interested in design and new technologies? Through our extensive range of courses, bootcamps, workshops, and seminars, we can help push your creative limits and build on your design skills. Taught in our new cutting-edge facility, our courses provide hands on experience in new technologies and machinery, develop your patternmaking and sewing skills, give you the opportunity to experience dying and fabrication techniques, and encourage diverse design learning.

HEALTH

Prepare for a rewarding career within the healthcare field or refresh previously acquired nursing knowledge and skills via Faculty of Health Continuing and Professional Studies (FOHCPS). Courses are short term with targeted learning objectives in nursing education and cater to both Licensed Practical Nurses (LPNs) and Registered Nurses (RNs). Courses include Nurse Ready, intended for healthcare professionals currently employed and looking to enhance their competency for a career change. Competency Assessment & Enhancement for Nurses (CAEN) is designed for nurses who wish to update their nursing practice skills. Upon successful completion of required courses, learners are able to meet their practice requirements and are prepared for careers in a variety of healthcare settings.
