The City of Castlegar is obligated to prevent anything from being erected/built that would violate that surface.

The ends of the runway are more restrictive - they start 60 m from the end of each runway at a width of 90 m (45 m either side of extended runway centre line) and diverge 10% as they extend out from the runway. The slope of this take-off/approach surface is 2.5% on the north end and extends out 2500 m to the north.
