

## Going Green Tip

### GHG Emissions From Cars

Ever wonder how many tonnes of GHG are in each fill up at the gas station? For a 50L fill up, 118Kg of CO<sub>2</sub> will be released into the atmosphere. Filling your tank once a week will emit over 6 tonnes in a year!

In BC for 2010, transportation accounted for 36% of the province's Greenhouse Gas (GHG) emissions.

### What You Can Do

- Carpool – Kwantlen has designated carpool parking at each campus.
- Take Transit – Kwantlen campuses have bus stops nearby.
- Ride your bike – Kwantlen has bike stands and bike lockers available for cyclists.
- Use our Intercampus Shuttle – Kwantlen has an intercampus shuttle service between the Langley, Cloverdale and Surrey Campuses.
