Dutch grading system

A student's workload (both contact hours and hours spent studying and preparing assignments) is measured in ECTS credits. According to Dutch law one credit represents 28 hours of work and 60 credits represent one year of full time study. The grading system has remained the same for several decades: the scale is from 1 (very poor) to 10 (outstanding). The lowest passing grade is 5.5; 9's are seldom given and 10's are extremely rare. Sometimes decimal grades are used (e.g. 7.8).
