

KPU Program Review Schedule

All KPU degree and non-degree programs are reviewed every five years, in accordance with the Program Review Policy and Procedure AC3. Degree and non-degree programs in the same discipline are reviewed together because of the integrated nature of their curriculum. Post-baccalaureate and graduate certificates, however, are reviewed independently because their curricular structure differs substantially from other programs within the same discipline.

The Program Review process may begin in September, January, or May of the academic year in which the review is scheduled. Below is the list of programs scheduled to undergo review between the 2025/26 and 2029/30 academic years.
