

FACULTY OF

ACADEMIC AND CAREER ADVANCEMENT

LYN NGUYEN

Taking ELS courses has been one of the wonderful experiences that I have gained in pursuit of my career. Making significant progress in these courses, I managed to read and understand longer articles from which I gradually expanded my academic vocabulary. Not only has my reading skill improved but so has my writing ability. Learning how to prepare a basic research paper will be helpful for my next step of study. The teachers and the partners are very supportive, especially my teachers who were very committed to assisting me in improving my English skills. To build a steady house, we need good bricks. So ELS provided me with a good background on which to build my career in Primary School Education. I would recommend the ELS program to anyone planning to study in Canada and I am looking forward to my further studies at KPU.

“To build a steady house, we need good bricks. So ELS provided me with a good background on which to build my career in Primary School Education.”
