NICK BRANSFORD

“Coming to KPU I faced challenges, not the least of which was meeting program prerequisites—in this case, Math 10 and 11—in pursuit of my B.A. English degree.

My goal was to complete my equivalency for Math 10 in less than two months. I brought this challenge to my ACP instructor and together we determined how I could succeed. My instructor worked tirelessly and did everything in his power to help me do well on my own terms.

In spite of the short time frame, my instructor always made sure to follow up, providing thorough and thoughtful guidance in understanding the problems I faced. The course may have been self-paced, but I never felt alone.

I passed the course with a B+ and proceeded to MATQ 1099 for Math 11 equivalency. Thanks to the careful instruction and dedication of ACP faculty, I succeeded here, too, with an A+ and renewed self-confidence.

Since graduating from KPU, I have held the position of Communications and Event Specialist with Student Services. I am grateful to the ACA Faculty and the ACP instructors for not only helping me achieve my goals, but also giving me a sense of belonging and self-worth.”

*“...my instructor always made sure to follow up, providing thorough and thoughtful guidance in understanding the problems I faced...
I never felt alone.”*
