

Rubric Design for GenAI

Dear Faculty,

The Teaching & Learning Commons (T&L Commons) is excited to introduce a new support for instructors considering the impact of Generate AI! Designing rubrics that meet your instructional needs while balancing academic integrity. Specifically, we are launching support for rubric development for GenAI considerations today!

The team in the T&L Commons will be available to provide feedback on assessment rubric design for mitigation, “leaning in,” and embracing the use of GenAI for assignment completion. Depending on your need, the feedback can support mitigation strategies to privilege human-generated content, or feedback for collaborating with Generative AI.

- Criteria Labels
- Rating Scale or Performance Levels
- Indicators for each Performance Level/Criteria

What to Submit:

We welcome you to submit your assignment instructions and assignment rubric. The Strategist will provide feedback. Email the GenAIRubrics@kpu.ca address with assignment instructions and rubric. Feedback will be provided within 3-5 business days.

If you have additional questions after reviewing our feedback, we are happy to provide 1:1 consultation.

*Please note this will not include suggestions related to redesigning your activities or assessments, this is supported through other workshops and consultations.
