

OPEN TO ALL KPU STUDENTS - FALL 2026
HYBRID, THURSDAYS 6:00PM - 8:50PM

FDIT 1130

User Interface (UI) Foundations

What is FDIT 1130?

Students will learn the principles of user interface (UI) design to strengthen their understanding of the relationship between UI design and UI (front-end) development. They will apply visual design principles, heuristics evaluations, and systems-based problem-solving to front-end design challenges. Students will further learn how to prototype and document common UI patterns as part of a shared design system.
