

OPEN TO ALL KPU STUDENTS - FALL 2026
TUESDAYS 1:00PM - 4:50PM

FDIT 2130

Motion Design for Interactive Applications

What is FDIT 2130?

Students will learn about motion design for interactive applications, applying visual design and scripting knowledge to user interface (UI) challenges. They will learn to create relevant and engaging experiences for users through transitions, animations, and interactions, integrating timing, sequencing, and storytelling techniques into front-end project workflows. Students will better understand the collaborative relationship between designer and front-end developer in developing animated features for interactive applications. Pre-req waiver required.
