

OPEN TO ALL KPU STUDENTS - FALL 2026
HYBRID, FRIDAYS 1:00PM - 4:50PM

DESN 3500

AI for Productivity in Design

What is DESN 3500?

Explore generative artificial intelligence and AI-driven tools for design productivity. From client brief to final proposal, students integrate AI into customized workflows, including tool testing, budget and material optimization, and client communication. Through practice and discussion, students examine AI's role and develop industry-relevant skills while applying innovative approaches to meet evolving professional demands. This course satisfies the upper year Bachelor degree breadth requirement.
