Rationale for why students need to be on campus: This course teaches interactive methods related to understanding and obtaining information from users of technical apparel. This includes, among other topics, skills in verbal and non-verbal communication, conducting focus groups, interviewing, quantitative and qualitative research design for proof of concept, conducting user-based concept testing research. Role playing, direct participation, and controlled pilot projects within the class are necessary to teach and to evaluate these skills. With the inability to perform user-testing research projects on a public population during COVID, the intent is to provide in-class activities under highly controlled and supervised conditions to teach these research skills.
